## 2/ Charge Code (City Rate)

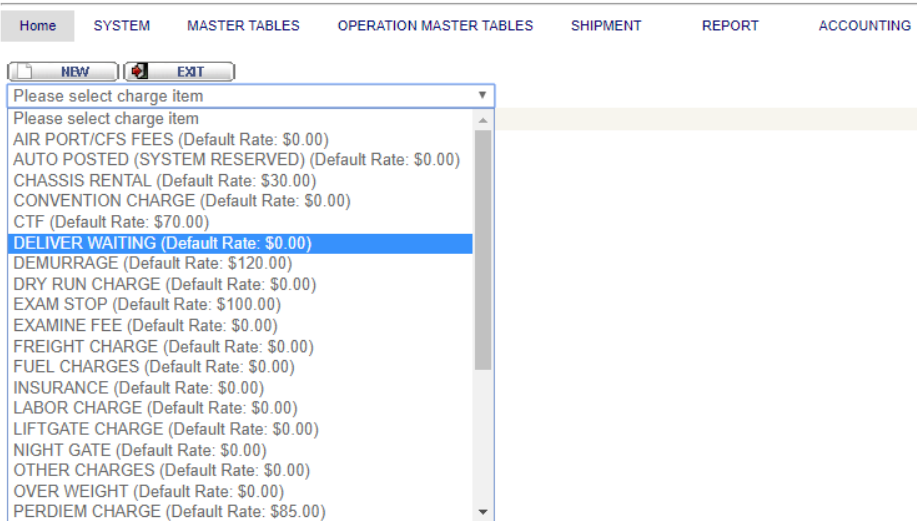

You can also setup charge item by city, in this way, for given charge item, there will be different rates for different cities.

To create city rate, select “Charge Code (City Rate)” as shown below.

Below the menu are buttons for NEW, FIND, and EXIT. A dropdown menu is open, listing various charge codes. The option 'Charge Code (City Rate)' is highlighted with a red rectangular box. Other options include Account Database, Charge Code (General Rate), Cost Code, Company Chassis, CHASSIS RENTAL, CONVENTION CHARGE, CTF, DELIVER WAITING, DEMURRAGE, and DRY RUN CHARGE.

Select charge item that you would like to add city rate, then click “New” button.

The screenshot shows the same software interface as above. The 'NEW' button is highlighted. A dropdown menu is open, displaying a list of charge items with their default rates. 'DELIVER WAITING (Default Rate: \$0.00)' is selected and highlighted in blue. Logic of getting rate :

When you create invoice, system will lookup city rate according to delivery city first, if it DOES NOT exist, it then pickup the general rate instead.

So in this example, delivery city is "CITY OF INDUSTRY", so when you check "CONVENTION CHARGE", \$88 will be picked up from city rate table.
